

Wiggly Animals

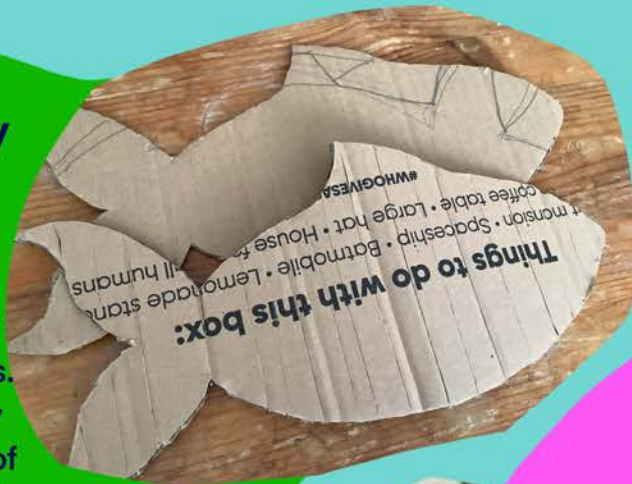

Making Guide

2D

Step 1: Make the Body

Draw the outline of your animal. Layer 2 pieces of cardboard together and cut out 2 identical animal shapes. Lay out the 2 shapes so they are mirrored. Score the side of the card that is facing up with vertical evenly spaced lines.

Materials List:

- Cardboard
- Wooden Skewers
- Tape
- Glue
- Scissors
- Decorative Bits

Step 4: Decorate!

Using coloured paper, paint, tape, stickers, beads etc give your animal features such as skin, scales, eyes and markings.

You can also use additional bits of card to create appendages such as fins, legs or feet.

Step 2: Handles

Line 2 skewers up vertically on the inside of one of the animal shapes, one towards the front and one towards the back. Secure them in place with tape.

Step 3: Assembly

Coat the inside of the animal shape with glue. Carefully sandwich the 2 sides together lining up the shape neatly. Leave under a heavy book while the glue dries.
